

Raccoony's Patent Application

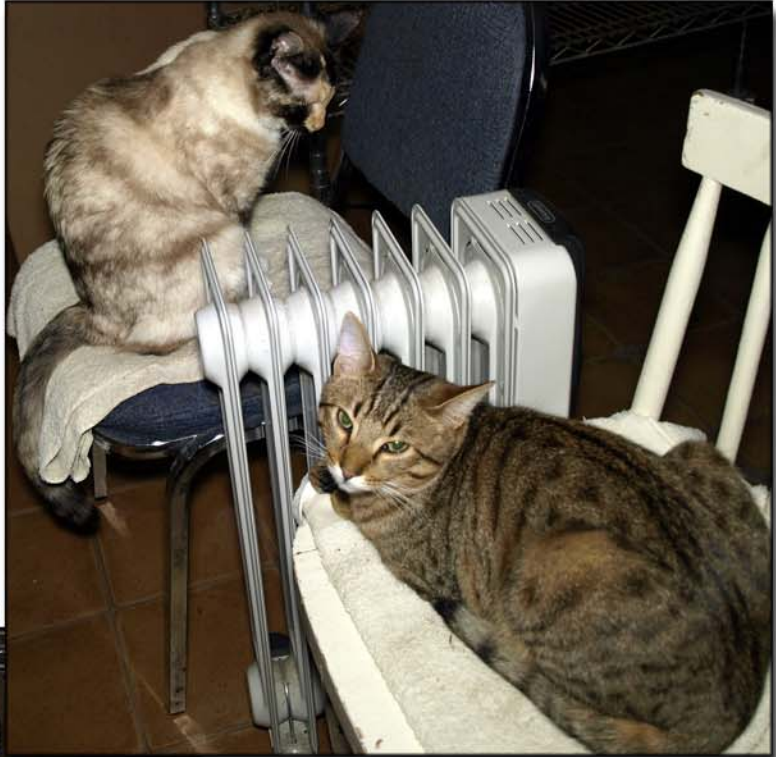

Dear U.S. Patent Office,

Please send me an application for a patent because I have invented a device that all cats will want to have. My best pal Verne helped me to invent it.

I need to protect this with a patent so I can sell these to make lots of money to help Verne buy a ranch. We are going to have dogs to protect the cats with orchards full of fruits for the pigs and goats. Oh, and a pond with ducks for the cats to chase, and even chickens for when we all get hungry.

(below) Dusty & Bobcat test Raccoony's invention

Another cat warming adventure from the inventors of Cat & Cactus Heaven

My invention is the *"Simultaneous 2-cat warmer by oil filled radiator."*

It features fluffy towel beds that can be laundered as needed.

(above) Inventor Raccoony contemplates a 3-cat version of her popular device.

I am developing a 3-cat warmer version but that costs more for the extra cat bed. Please send my Patent Application right away to *"Raccoony c/o Verne, Cat & Cactus Heaven."* Thank you so much!
